

Iowa MSHA State Grant Program

TRAINING ASSISTANCE FOR MINES

The Iowa Department of Education was awarded a grant from the U.S. Department of Labor Mine Safety & Health Administration (MSHA), to provide training for Iowa mine owners/operators/contractors. This funding allows for reduced cost mine safety training at Iowa's fifteen community colleges.

Providing training to small mines is the focus of the grant. The colleges are offering open classes to group workers for the training. The enclosed schedule contains the course identification, description, and contact information. Registration for each worker is \$49 for a one-day class. To register, phone the contact listed at the community college nearest you.

QUALITY TRAINING FOR WORKERS

Iowa's MSHA State Grant Program classes are taught by certificated MSHA instructors who are approved to train under the state grant program. The training they deliver is:

- current with federal and state mining regulations, policies and procedure;
- topical to current trends in the causes of mining accidents and "near misses"; and
- applicable to workers in Iowa's mine operations.
